9381622625

Telangana, India

SUMMARY

Tech enthusiast skilled in Python, AI, ML, JAVA, and web technologies. Passionate about solving complex problems and developing innovative solutions. Always ready to grab new opportunities and experiences.

EDUCATION

- Mallareddy University** Hyderabad, India
Btech-CSE AIML : CGPA:8.6 2022-2026
- Sri Chaitanya Junior College** Hyderabad, India
Board of Intermediate Education,Telangana Marks:886 2020-2022
- Sri Vatsal Gurukul Vidyalaya** Hyderabad, India
Central Board Of Secondary Education CGPA: 7.7 2019-2020

SKILLS SUMMARY

- Programming Languages :** Python, Java, SQL
- Development Technologies:** HTML, CSS
- Libraries:** Matplotlib, Numpy, Pandas
- Soft Skills:** Adaptive, Communication Skills, Work Ethic, Teamwork,Leadership

EXPERIENCE

- NRSC,ISRO**
May/2025 - June/2025
 - Contributed to an end-to-end SAR ship detection system combining YOLOv8 for ship localization and the MAESTRO transformer-based model for accurate size estimation.
 - Implemented modules for image preprocessing, bounding box post-processing using Minimum Bounding Rectangle (MBR), and metric-based evaluation (Precision, Recall, F1-score).
 - Developed automation scripts for dataset normalization, annotation conversion to YOLO format, and ship dimension calculation in real-world units using OpenCV.
 - Technologies Used: Python, OpenCV, YOLOv8, MAESTRO (PyTorch-based), OpenSARShip Dataset, NumPy, Matplotlib.

PROJECTS

- Face Recognition Attendance System:**
 - Developed a real-time attendance system using Haar-Cascade for face detection and FaceNet embeddings for recognition.
 - Implemented the solution in Python and OpenCV to ensure real-time performance with minimal latency.
 - Achieved 92 accuracy on a dataset of more than 2,000 images, significantly reducing manual attendance marking effort and errors. Designed the system to be scalable for classrooms and workplace automation.
- Mental Health Chatbot (RAG + LLM) :**
 - Created an AI chatbot capable of providing supportive and empathetic responses for basic mental wellness guidance.
 - Built with a retrieval-augmented generation (RAG) pipeline using llama3.1 and integrated with LangChain for document retrieval and context handling
 - Trained on Mental health conversations datasets to deliver context-aware and emotionally sensitive responses.

CERTIFICATIONS

- AWS** — CompletedAWSCloudPractitioner Essentials, gaining foundational knowledge of AWS Cloud concepts, core services, security, pricing models, and cloud architectural principles.
- GDSC** — Participated in the Google Cloud GenAI Workshop organized by GDSC, gaining hands-on experience with Generative AI models and cloud-based deployment on Google Cloud Platform (GCP).
- AI** — Completed the Introduction to Artificial Intelligence course on Coursera, covering core AI concepts including search algorithms, knowledge representation, and basic machine learning techniques.
